# 50 years of ingenious ideas and winning technology

Established in 1959

by honoris causa Engineer Mauro Mantecchini,  
**FIUDI – Fabbrica Italiana Utensili Diamanti Industriali**

is a leader in the development and production of PCD and PCBN machining tools.

50 continuous years of history, of successes, of technological achievements and total dedication to meet the needs of Customers, who have made **FIUDI**:

- A brand known throughout the world
- A leading provider of special tool technology
- The industry standard for those who seek the best in innovation and quality.

To chose **FIUDI** means to have on one's side:

- 50 years of proven, specialized experience
- Partners ready to listen and back the Customer at every stage of the process

- Strategic problem appraisal
- Proposal of tool technology to be adopted
- Co-design
- Shared testing
- Implementation of optimum solution.

## Co-design is the most effective solution to delicate problems

## Because with FIUDI true personalization is always standard.

## We invest in technology to produce quality

Quality without trade-off vis-à-vis the environment and the process. **FIUDI** has opted for maximum customer satisfaction with an eye to the environment.

## Where technology matters most, FIUDI is the leader.

Precision, durability, technological excellence, cost effectiveness.

The quality of **FIUDI** products, together with their unusual design and manufacturing flexibility, make them the best option for applications in the following sectors:

- Automotive
- Aeronautics and space
- Energy
- Hydraulics and gas
- Electrical components
- Bio-engineering
- Jewellery making
